

OFFICE OF THE DISTRICT ENGINEER
DISTRICT NUMBER TEN
SOS USAF CBI
APO 493

1 July 1944

SUBJECT: Construction Progress

TO : Area Engineer, Area VI, APO 631.

1. It is desired to compliment you, along with your Officers and Enlisted Men, on the outstanding accomplishments performed in meeting June 30th target dates imposed on this District by higher headquarters. The efficient manner in which your organization has produced required aggregates for concrete placing has been a material factor in effecting this work. Progress figures indicate that limited operation requirements were more than complied with at each of the four (4) priority fields.

2. In my opinion, this represents a superior spirit and an intense desire among the officers and enlisted men of your command to get the job done. Your men have had a large share in making possible a very important tactical operation and their work is reported in an article in the June 23rd "Command Post".

3. It is requested that you communicate to your officers and men my appreciation for their outstanding efforts.

/s/ K. E. Madsen
/t/ K. E. MADSEN
Lt Colonel, CE,
District Engineer
